Works for Education

COLLECTION

Products shown within the Works for Education Collection are NZ stock items, available in 500m2+ quantity.

Please note, there are many other colours available both within the NZ stock offering and global indent collections. Contact your Account Manager or visit www.inzide.co.nz for more.

Colour in Education spaces

There is perhaps no more important space to harness the power of good design than in that of education. When children have a positive experience of education at an early age, it inspires and stimulates them, and can ignite a passion for learning.

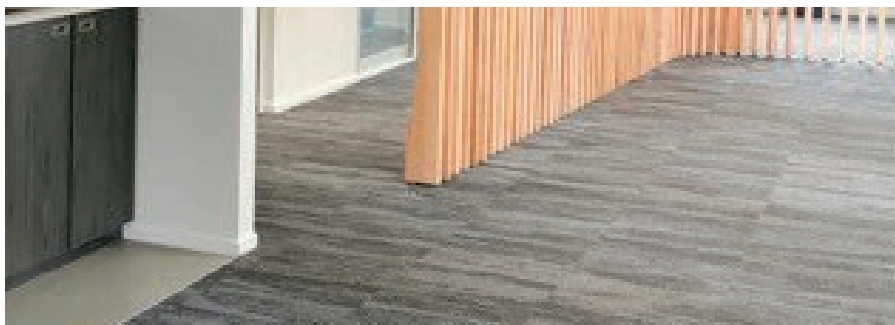

So, what colours can actually enhance creativity, focus and concentration? Of course cultural and social influences will affect this, but when looking for colours that have universal appeal those drawn from nature can tap into positive experiences shared by all, best explained through the Ecological Valence Theory.

Green is known to be the easiest colour for the retina to perceive and, as such, is the best for long-term concentration, while blue has been found to boost creativity and enhance participants' ability to think 'outside of the box'. It is thought that the association with water and the sky makes us open and calm enough to be explorative and creative. Blue has also been linked with improved productivity. Therefore, in a learning environment, it would be useful to use blue where difficult subjects are taught or students may ordinarily experience stress.

However, to avoid the colour scheme becoming too monochromatic, warmer shades such as yellows, oranges and reds can help to create a more lively and cheerful atmosphere. As with anything, use these bolder colours in moderation, particularly for younger students who are already prone to over stimulation.

Overall, colours can be a cost effective and impactful way to create the desired feeling of a space. Cooler colours are good for calm, focus and concentration, whereas warmer colours help students to stay happy, alert and attentive, and add a youthful touch.

More than face value

In an education environment it's impossible to prevent dirt and spills. That is why Intercept and Protekt are permanently incorporated into all Interface, carpet tiles. Together they extend the life of your floor.

Intercept offers protection from the microbes (viruses, bacteria and mould) that can affect not only the life of the carpet but also the indoor air quality. Solution dyed nylon & Protekt ensures that each tile is soil and stain resistant thanks to a coating that provides a barrier against permanent damage, as it is a yarn that cannot absorb a dye.

Safe for future thinkers and our world

Now more than ever before, young minds are thinking of the impact that we all have on our environment and expecting the environments they inhabit to reflect their sustainable values.

All Interface products are certified carbon neutral, are closed loop recyclable through the ReEntry recycling program and made of highly recycled materials, with very low VOC's.

All Forbo products meet best practice PVC standard ISO14001 to be phalate free, with low VOC's.

WORKS STREAM

GRANITE
QUARTER- TURNED

Interface®

Colour Highlights | Granite Base

Granite provides a warm mid-grey base, with the option of a blue, green or red highlight tile. The lighter base colour alters the overall vibrancy of the highlight colours, softening the look and creating an inviting, homely feel.

GRAPHITE
MONOLITHIC

Interface®

Colour Highlights | Graphite Base

Graphite is a very forgiving colour which makes a bold statement within a space.

With the option of a blue, green or red highlight tile, the colours pop against the dark base, making them appear more vibrant than those used in the graphite base. The graphite tiles give a sense of movement and energy, ideal for high traffic areas.

SHARK 50503

Technical Specifications

Manufacturer	Forbo
Product definition	General Purpose Vinyl
Format size	2m x 25m - sheet
Total thickness	2mm
Surface finish	SMART Top
Resistance to chemicals	Very Good
Abrasion resistance	Group T
Slip resistance rating	R10 / SRV 42
Use in wet areas	Yes (not for ramps)
Fire rating	9.2Kw/m2

Performance Specifications

Area of use	Commercial, general use
Warranty	15 year warranty

FLOORING SYSTEMS

STEEL 50011

Technical Specifications

Manufacturer	Forbo
Product definition	General Purpose Vinyl
Format size	2m x 25m - sheet
Total thickness	2mm
Surface finish	SMART Top
Resistance to chemicals	Very Good
Abrasion resistance	Group T
Slip resistance rating	R10 / SRV 42
Use in wet areas	Yes (not for ramps)
Fire rating	9.2Kw/m2

Performance Specifications

Area of use	Commercial, general use
Warranty	15 year warranty

FLOORING SYSTEMS

SOLIDSTEP

CHARCOAL 179992

Technical Specifications

Manufacturer	Forbo
Product definition	Safety Flooring - slip resistance particles included
Format size	2m x 20m - sheet
Total thickness	2mm
Slip resistance rating	R10 / SRV 55
Use in wet areas	Yes
Use on ramps	8.3Kw/m2
Fire rating	

Performance Specifications

Area of use	Commercial, general use
Warranty	15 year warranty

FLOORING SYSTEMS

STEP REPEAT

SR999 IRON

Technical Specifications

Manufacturer	Interface
Product definition	Tufted textured loop
Format size	50cm x 50cm
Backing	GlasBac®
Pile thickness	3.5mm +/- 0.5mm
Total thickness	7.5mm +/- 0.5mm
Recycled content	Up to 57%
Anti-microbial	Intersept®
Soil & stain protection	Protekt®
Fire rating	5.3Kw/m2

Performance Specifications

Area of use	Commercial, general use
Warranty	Limited 5 year warranty
