# Entrance Matting

Everybody knows that feeling of pride that comes with walking on a newly installed, clean floor. And the disappointment as it becomes dirty and worn, especially within an industrial environment. There is a way to keep your floor clean, and presentable year-in-year-out. All you need is a well thought through entrance matting solution. Entrance matting reduces the risk of slipping (think fire exits) and safeguards your flooring investment from scratching & soiling.

Entrance matting pays for itself within 6 months.

**Recovers as new**

Forbo Coral can withstand intense cleaning regimes

**95%** of dirt and moisture can be kept outside the building

Recommended for the first **3 meters** of any entrance

# Homogeneous Vinyl

Vinyl floors are popular because of their durability, low maintenance cost and versatility. Homogeneous vinyl flooring is made of 1 single layer that offers vibrancy and depth of colour. It is incredibly stain resistant which makes it suitable for laboratories, corridors and heavy traffic areas.

The Sphera Collection by Forbo offers striking designs and has a SMART-Top surface finish, ensuring a high resistance to chemicals, scratches and stains. With a class leading, Group T abrasion resistance rating you can feel confident that Sphera will look great for years to come.

Sphera can also be used as a wall vinyl with a Group 3 fire rating.

# Safety Vinyl

The Step Safety Vinyl collection by Forbo provides a complete range of products designed to meet safety demands across a wide range of applications. From general areas to more extreme areas such as commercial kitchens, wetroom (barefoot) and industrial applications.

Step meets the NZS 4586:2013 standard, delivering safety with minimal compromise in terms of cleaning and maintenance. All Step safety vinyls provide slip resistance throughout the life of the product with the inclusion of carborundum crystals.

# Specialist Solutions

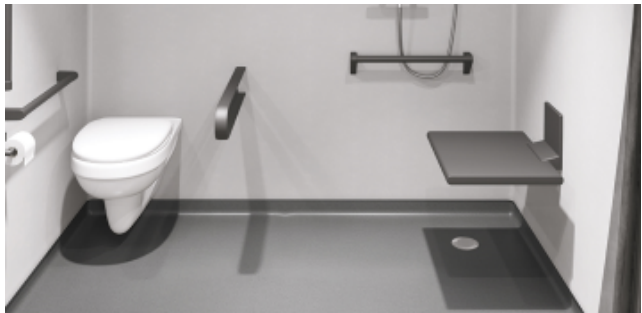

Sarlibase is a flexible, rotproof and waterproof insulated underlay that comes in 2mx30m rolls, comprising of a fibreglass mat impregnated with synthetic resin. Achieving significant sound reduction figures when used under carpet tile, vinyl, LVT & Marmoleum, it is the go to acoustic substrate.

Onyx+ is a vinyl wall surfacing that is perfectly suited for commercial wetroom applications. Onyx+ must be heat welded and as such provides a smooth, hygienic surface that ensures it is not a breeding ground for bugs and bacteria.

## Sarlibase

Sound reducing underlay with minimal indentation 

## Waterproof

## Onyx+

Wetroom wall vinyl co-ordinates with Step safety vinyls and has a Group 1 rating

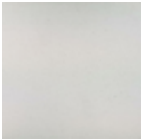

## Sphera Vinyl

Can also be used as a wall lining with a Group 3 rating (See pages 13 & 14 for options)

## Rubber

### Nora by Interface (Norament & Noraplan)

Rubber is the ideal flooring solution in heavy traffic areas, where impact sound reduction and comfort are important. Airports, atriums and areas where staff are standing continually.

Rubber is a highly technical, specialist product that performs incredibly well, it is available in sheet and tile formats.

# *ESD & Cleanroom*

Colorex is the best known static control flooring on the market. The homogeneous pressed tile offers high quality and consistent performance. You can even drive forklifts on it.

Colorex Static Dissipative (SD) and Electro-Conductive (EC) properties remain for the lifetime of the product. With exceptional stain and chemical resistance and high hygiene levels. Suitable for specialist environments such as ISO standard clean rooms, laboratories, server rooms and electric manufacturing plants among others.

**Ideal for  
Laboratories**

**Repairable**  
Deep scratches, holes and burns are all easily fixed without leaving any visible trace

**Ideal for  
Data Centres &  
Server Rooms**

Dense construction provides excellent resistance to heavy loads
